

RUTGERS ATHLETIC PERFORMANCE CENTER PARKING GARAGE, PISCATAWAY, NJ

PARKING FOR ATHLETES

This 307,000 SF mixed use project consists of an Athletics Performance Center with an adjacent **535-space**, open, precast parking structure. This new facility allows for the relocation and consolidation of multiple sports teams in a centralized location across from the Rutgers Athletics Center (RAC), helping to define a larger Athletics District. The four level building provides athletics facilities for the men's and women's basketball, gymnastics, wrestling and volleyball teams with state of the art locker rooms, practice venues, strength & conditioning suites, sports medicine, coaches' offices and meeting rooms.

The garage provides parking for the building as well as athletic events at the RAC, the adjacent Rutgers Business School and other planned future developments in this area of the campus. The functional design of the garage includes a single helix ramping system that utilizes 90 degree parking stalls and two way drive aisles. The garage's white architectural precast and sand blast finish matches the precast cladding façade panels on the building. In addition, the exterior of the garage is clad with perforated aluminum panels.

The Harman Group, now IMEG provided the garage functional design and parking consulting services for the project.
